PROFESSIONAL SUMMARY

BCA graduate with one year of dedicated cybersecurity training spanning SOC operations and penetration testing. Combines a red team mindset with blue team discipline — understanding how systems are compromised translates directly into knowing what to look for when defending them. Detail-oriented, calm under pressure, and committed to continuous learning in a field that never stands still.

CORE COMPETENCIES

SOC Operations • SIEM Monitoring (Splunk) • Threat Detection & Analysis • Incident Response • Log Analysis
Network Traffic Analysis (Wireshark) • Vulnerability Assessment (Nessus, Nmap) • Penetration Testing (Metasploit, Burp Suite) Alert Triage • Incident Documentation • Linux Administration • Python Scripting • Networking

TECHNICAL SKILLS

Pentesting Tools: Burp Suite, Metasploit, OWASP ZAP, Nmap, Nessus, Kali Linux Tools, Fuzzing Tools

Pentesting Domains: Web Applications, REST APIs, Android/iOS Mobile Apps, Network Infrastructure

Security Standards: OWASP Top 10, NIST Cybersecurity Framework, MITRE CWE, CVE

SIEM & Monitoring: Splunk, Wireshark, Log Analysis, Alert Triage, Wazuh

Operating Systems: Linux (Kali, Ubuntu), Windows

Programming: Python, HTML, CSS, JavaScript

Cloud Familiarity: AWS & Azure fundamentals; cloud-based attack surface awareness

Domains: SOC Operations, Penetration Testing, Vulnerability Assessment, Incident Response

EDUCATION

Bachelor of Computer Applications (BCA) | *JDT Islam Arts & Science College* | Calicut, Kerala 2022 – 2025

CYBERSECURITY PROJECTS & LABS

Web Application Penetration Testing – Lab Practice | *Self-Directed / OWASP Lab Environments*

- Performed VAPT on intentionally vulnerable web applications (DVWA, etc) simulating real-world engagement workflows
- Exploited OWASP Top 10 vulnerabilities including SQL Injection, XSS, IDOR, CSRF, and Broken Authentication using Burp Suite and OWASP ZAP
- Documented identified vulnerabilities with severity ratings, proof-of-concept steps, and remediation recommendations aligned with NIST and MITRE CWE

Network Scanning & Vulnerability Assessment | *Self-Directed / TryHackMe / Lab*

- Performed network reconnaissance and vulnerability scanning using Nmap and Nessus across simulated enterprise environments
- Used Metasploit Framework to exploit known CVEs and validate patch effectiveness on test systems
- Analyzed network traffic with Wireshark to identify suspicious patterns and protocol anomalies

- Practiced privilege escalation and post-exploitation techniques on Kali Linux in isolated lab environments

EXPERIENCE

Intern – App Development & UI/UX | *Regional Technologies* | Calicut, Kerala 2024 (3 Months)

- Contributed to mobile application development using Flutter, focusing on UI/UX design and usability
- Collaborated with the development team to implement and test application features
- Gained exposure to software development lifecycle, version control, and team-based workflows

PROJECTS

JdtALLn1 – All-In-One College Resource Booking System

- Built a full-stack booking platform for college resources including turf scheduling, lab booking, and status tracking
- Developed backend using Python (Django) and cross-platform frontend using Flutter
- Implemented real-time status updates, scheduling logic, and an admin dashboard for resource management

TRAINING & WORKSHOPS

- Ethical Hacking & Cybersecurity Workshop – JDT Islam Arts & Science College
- ODOO ERP Workshop – Cybrosys Technologies, Calicut
- Industrial Visit – Spectrum Softtech, Kochi (exposure to enterprise IT and software operations)
- Flutter Mobile Development Workshop – JDT Islam Arts & Science College
- Hardware & Software Fundamentals Workshop – JDT Islam Arts & Science College

CERTIFICATIONS

- **Cyber Security Fundamentals – IBM**
Core Cybersecurity principles, security operations, risk management, and security awareness practices.
- **Fortinet Certified Associate (FCA) in Cybersecurity**
Gained foundational knowledge in network security, threat landscape, and Fortinet's security fabric architecture.
- **eJPT – eLearnSecurity Junior Penetration Tester** (*In Progress*)
